

Y12 into Y13 Chemistry Transition Work for Summer

1. Ensure your folder is ready with dividers for your Yr13 work.
 - a) Teacher 1 and 2 dividers
 - b) Homeworks
 - c) Assessments
 - d) Independent work
 - e) Extra reading
2. RAG rate your PLC from the UCAS exam and so you are aware of your strengths and areas for improvement.
3. Create Flashcards for all of the Chapters 2-17 (definitions, equations, mechanisms, etc)
4. Complete the End of Chapter tests for Modules 2-4 from Kerboodle, these are on the Yr 12 Sharepoint under "Transition Work Summer".
5. Complete the Year 1 content from your CGP workbook.

It is crucial that you are bridging the gaps in your knowledge as you will understand the Yr13 content so much more because of this. Please understand that Yr13 is more difficult than Yr12 so you really need to hit the ground running in September, (but also have a deserved rest).

See you in September Yr13!
